scientific path
Model
H, observables, reference state
Reduction policy
pass through
sector storage / tapering: exact
contextual: approximate
Solver / consumer
A-CASE | QSCI / selected CI
ADAPT-VQE | hybrid
Evaluation and cost
exact pairing | measurement
classical processing | resources
generator filtering changes the candidate pool, not Hilbert-space width
result, method and scope inform evidence
claim path
Config / plan
acceptance rule
preregistered when declared
Labelled result
value + scope; uncertainty if known
Versioned record
inputs + provenance + outcome
Gate
declared checks
Disposition
admit | refuse | indeterminate
shared contracts: MV | Program / PauliSum | Backend | Restriction | CompiledMeasurementPlan | evidence declarations
