0
5000
10000
15000
physical lines (annotated: lines / modules)
(b) Selected dependency edges (partial)
solid: import-time
red dashed: upward runtime
blue dashed: optional bridge
Evidence and reproduction
benchmarks/, verify.py, reproducibility.py
Algorithms / solvers
subspace/, algorithms/
Problem definition
models/
Measurement
measurement/
Execution
backends/
Program IR
IR, QASM3, encodings, shared candidates
Algebra kernel
multivector.py, pauli_kernel.py, ...
Optional bridges
stim, OpenFermion, pytket, PennyLane, PyZX
red upward: measurement → subspace; kernel → backends
blue downward: Program IR → optional bridges (deferred)
